

- Be sure to save your entry at the bottom of any page if you need more time to gather data by clicking the 'Save' or 'Save and Next' button.
- Once you are ready to submit your entry, please click 'Save' and 'Add to Cart' at the bottom of the final page. **Note that you will still need to press 'checkout' at the bottom of the following screen before you are prompted to enter your credit card information. Entries are not officially entered into the contest until the payment step has been completed.**
- You can complete your submission and/or create additional entry forms for other projects under your login credentials at any time until your region's entry deadline.

Early Bird Deadline: No Entry Fee Through June 1, 2022
Regular Deadline: Aug. 1, 2022

SUBMITTER INFORMATION

Please complete all required fields. Required fields are designated with a (*).

Note that ENR acknowledges the main project team firms at the awards event and in print, in addition to the submitting firm.

For the remaining project team firms, please upload a project team list as a PDF, Excel or Word document listing other key firms that worked on the project. Please include any additional engineers or design consultants (e.g. landscape) and key subcontractors (e.g. electrical, steel, concrete, mechanical). Best Projects honors the entire project team, so this information helps us recognize the team's outstanding work in print and at the awards banquet, as well as to notify the team of the award.

Upload Project Team List:* (Upload Size Limit 10MB)

JUDGING CRITERIA

Projects will be judged on the information you provide in response to the following questions. **Be specific!** Limit the use of broad marketing fluff and focus on specific examples of why your project is the best in the selected category. Relate your answers to the category in which you are entering. For example, if you are submitting in the Small Project category, make sure your responses address how your team maximized the outcome with a minimal budget. To provide the judges with the most compelling information on your project, you should involve the primary project team in crafting your responses, such as contractor, design firm and owner.

1. Project Description

Describe the Project (300 words or less):*

2. Overcoming Challenges and Teamwork

Describe any challenges or issues that the design and construction team faced, managed and overcame. Be specific about the problems and solutions, and describe how teamwork was used to accomplish the project goals. If the project was completed below the original budget and/or ahead of original schedule, how was that accomplished? If your project was delivered above the original budget or after the original delivery date, please explain if there were budget/schedule changes approved by the owner, or detail any mitigating circumstances that led to the outcome.

- a. Project Budget:*

- b. Project Schedule:*

- c. Project Budget/Schedule Notes (150 words or less):

3. Safety

How well did the project team go above and beyond the local and international industry safety requirements on the submitted project? What training/safety programs were implemented to prevent injuries and assure a safe jobsite? How did the incident rates compare to number of worker hours? Were there any extenuating circumstances regarding safety that involved the local climate (political or natural) where the project was built? **Include measurable safety statistics/metrics and results.**

- a. Incident/Injury Rate:

- b. Lost Time Accident Rate:

- c. Total Worker Hours on Job:

- d. Safety Description (300 words or less):*
4. Innovation & Contribution to the Industry/Community
In what ways did this project innovate, or help elevate industry standards? Describe any unusual construction techniques, design elements, materials or new technology used for the project. How will this help the project benefit the client, community or construction industry?
(300 words or less):*
5. Construction Quality & Craftsmanship
Describe how the construction team excelled in terms of quality and craftsmanship. How did the contractor and subs exceed expectations and achieve extraordinary results?
(300 words or less):*
6. Function and Aesthetic Quality of the Design
How well does the design - whether architectural or engineering - fulfill the project's function? Does the project fit within the context of its local surroundings and its intended use? For projects with an international design team, describe how your team communicated with the client and each other to provide the best results for the local end users.
(300 words or less):*

SUPPORTING PHOTOS AND DOCUMENTS

Please upload up to ten photos of the submitted project. **DO NOT SUBMIT RENDERINGS AS PHOTOS.** Photographs can be a mix of completed project photos and progress photos that relate to the category to which you are submitting and that best show the judges the innovation and quality of your project. Photos that depict key aspects of your project narrative work best, with a caption indicating what the judges are seeing. The photo you place in spot #1 will be the first one the judges will see, so we recommend putting your best overall photo there. If you wish to submit schematics, floor plans or renderings, please do so in the 'optional document' field below.

Size limit is 25MB per photo.

Note: Before **and** After photos are required in the Renovation/Restoration category. Do not put the 'before' photo as photo 1 since that's the first photo the judges will see.

Recommended – Supporting Documents/Schematics

You may upload one supporting document or PDF that is no more than 5 pages. Judges often benefit from an elevation, site plan or other schematic. If that's not available, consider submitting a testimonial letter from the project's owner.

Uploading Supporting Document Here:

- Be sure to save your entry if you need more time to gather data. Once you are ready to submit your entry, please click 'Add to Cart' below.
- **Note that after clicking 'Add to Cart' below, you will still need to press 'checkout' at the bottom of the following screen before you are prompted to enter your credit card information. Entries are not officially entered into the contest until the payment step has been completed.**
- You can complete any drafts and/or create additional entry forms for other projects under your login credentials at any time until your region's entry deadline.
- Please take an extra moment to review your responses before submitting. **After checkout, you will be able to review your entry but will not be able to edit it.**
