## 1. INTRODUCTION

### 1.1. Corozal and Telfers Container Terminals Initiative

a) The Autoridad del Canal de Panamá ("ACP"), is an autonomous legal entity established under pursuant to Title XIV of the Constitution of the Republic Panama and acting within the legal framework described in Section 1.2 below, requests Statements of Qualifications ("SOQs") from interested parties ("Interested Parties") seeking to enter into separate concession agreements for the development of the Corozal Container Terminal and the Telfers Container Terminal (defined in this Request for Qualifications ("RFQ") prior to the issuance of the Request for Proposal ("RFP") as the "Initiative" or the "Project"). The Initiative will be designed to develop:

- i. a container terminal in Corozal, located at the Pacific entrance of the Panama Canal (the "**Corozal Container Terminal**"); and
- ii. a container terminal in Telfers Island located at the Atlantic entrance of the Panama Canal (the "**Telfers Container Terminal**", together, the "**Terminals**" and each a "**Terminal**").

The development of the Initiative will comply with international standards for safety, environmental protection, and operational excellence.

- b) The Initiative addresses operational and market challenges, such as congestion and capacity limitations at surrounding ports. By expanding open-access container transshipment capacity through common-user terminals, the ACP seeks to strengthen the Panama Canal's competitiveness, enhance connectivity between continents, and ensure that the Panama Canal remains a global, neutral logistics hub integrated within the interoceanic logistics ecosystem.
- c) The ACP anticipates that the Initiative will be delivered through a phased build-up of each Terminal including completing the ongoing feasibility studies, design and engineering of each Terminal; environmental and social impact assessments, construction and thereafter operation and maintenance.

### 1.2. ACP's Legal Framework

- a) The ACP is an autonomous legal entity established pursuant to Title XIV of the Constitution of the Republic of Panama and organized by Law No. 19 of June 11, 1997 (the "**Organic Law**"). The ACP is exclusively in charge of the administration, operation, conservation, maintenance, and modernization of the Panama Canal and its related activities and services, including activities and services that complement the operation of Panama Canal (the "**Complementary Activities**"), in a manner that is safe, continuous, efficient, and profitable. The ACP has its own patrimony, rights, assets, and the right to administer them under its jurisdiction. Information on the ACP's history, operations, financial performance, market and organization is available (for convenience only) at <https://www.pancanal.com/>. Such

---

information does not form part of this RFQ.

- b) ACP's special legal regime is developed by the Organic Law, and the ACP's regulations which are legal instruments issued exclusively by the ACP's Board of Directors to further develop and regulate the principles established by the Organic Law.
- c) Specifically, Article 18(5) of the Organic Law provides that the Board of Directors has the power to approve regulations necessary and convenient for the proper functioning and modernization of the Panama Canal, including the granting of concessions.
- d) Accordingly, the ACP's Board of Directors, in the exercise of the powers granted by the Constitution and the Organic Law, has enacted specific rules governing its activities, including, among others: (i) Agreement No. 4 of January 7, 1999, and subsequent modifications thereto which regulates the "Establishment of Tolls, Fees, and Charges for Transit through the Canal, Related Services, and Complementary Activities" (the "**Complementary Activities Regulation**"), (ii) Agreement No. 35 of May 30, 2000, and subsequent modifications which approves the "Regulation on Commercial, Industrial, and Service Activities" (the "**Commercial Activities Regulation**"); and (iii) Agreement No. 337 of January 17, 2019, and any subsequent modifications thereto which approves the Regulation on Concessions of the Panama Canal Authority" (the "**Concessions Regulation**").
- e) Article 8 of the Complementary Activities Regulation allows the ACP to engage in complementary activities such as dredging, power generation, water processing, telecommunications, logistics and port activities, complementary maritime services for ships that are carrying out activities in Panama Canal waters, and any other complementary marine services to vessels that are not included in the related services or tolls.
- f) Article 6 of the Commercial Activities Regulation provides that the ACP may engage in commercial, industrial or service activities that complement the operation of the Panama Canal, including, among others, those of an industrial, logistical, port, or maritime nature, either directly at prices and rates that must be uniform according to the nature of each particular service, or potentially, through concessionaires, for which the concessionaire selection processes established in the Concessions Regulation shall apply.
- g) The Concessions Regulation establishes rules and procedures governing the granting of Concessions by the ACP to third parties. Pursuant to Article 2, such Concessions may confer rights to: (i) the exploitation of a patrimonial real property asset or an asset administered by the Authority, whether it refers only to its occupation or involves the extraction, subtraction or removal of the elements contained therein; (ii) the development or performance of commercial, industrial or service activities provided to the Authority and/or third parties; (iii) the provision of a public service; or (iv) the execution of public works, in all cases in accordance with and subject to the Concessions Regulation and the authority of the ACP.
- h) Under its special framework, the ACP has been vested with competence over the land and

---

---

bodies of water that comprise the Panama Canal where the container facilities of this Project are to be located. Furthermore, the ACP has acquired all necessary easement rights over the other areas to be affected by the Project's footprint.

- i) Therefore, in accordance with its constitutional, legal, and regulatory framework, the ACP has the legal capacity to grant a concession with the purpose of developing or performing commercial, industrial or service activities provided to the ACP and/or third parties related to these Initiatives.
- j) Furthermore, Article 44 of the Concessions Regulation allows the establishment of special procedures for the selection of concessionaires, which shall be subject to prior approval by the Board of Directors and when such procedures protect the interests of the ACP with greater effectiveness than the provisions contained in the Concessions Regulation or, in the absence of any relevant provisions, are deemed necessary or convenient for the interests of the ACP.

### 1.3. Tender Process Overview

- a) To select the concessionaire(s) for the Initiative, the ACP envisions a competitive and transparent three-stage (3) tender process (the "**Tender Process**"), outlined in general terms below:
  - i. **Stage 1: Prequalification.** As the first stage in the Tender Process, this RFQ sets forth the qualifications for prospective concessionaires. Based on the evaluation requirements set forth in this RFQ, the ACP will establish a list of prequalified parties (the "**Prequalified Parties**").
  - ii. **Stage 2: Interaction and Dialogue.** Prequalified Parties will receive the general Request for Proposals or General RFP ("**General RFP**") (which includes the draft Concession Agreement) in relation to each Terminal for review and discussion during a series of confidential individual meetings with the ACP. During this stage, the ACP will provide a list of documents, and previously conducted feasibility studies, data and analyses related to the Concession ("**Relevant Information**"). As part of these discussions, the ACP will invite Prequalified Parties to share their feedback and observations regarding the Concession Model, general evaluation criteria, conditions and requirements, and the draft Concession Agreements and general performance indicators, among other elements. Based on the feedback provided by the Prequalified Parties, the ACP will circulate updated General RFP and Concession Agreements for each terminal for a final round of comments, prior to closing Stage 2.
  - iii. **Stage 3: Request for Proposals.** After Stage 2 above is completed, the ACP at its sole discretion reserves the right to issue the RFP which shall establish the eligibility rules to award the Concession to the Binding Offer that is best aligned with ACP's best interest and strategic objectives in a manner consistent with the constitutional principles of the

safe, continuous, efficient, and profitable operation of the Canal and its Complementary Activities, aiming to promote fair and reasonable business practices. Prequalified Parties that comply with such eligibility rules may submit their Binding Offers in response to the RFP.

#### 1.4. Definitions and Glossary

Schedule 1 of this RFQ contains a glossary and the definition of certain terms used in this RFQ, which is incorporated and made an integral part of this RFQ.

## 2. DESCRIPTION OF THE INITIATIVE

### 2.1. Background

- a) Under its special legal regime, the ACP has exclusive control and jurisdiction over the land and bodies of water that comprise the Panama Canal, including the areas where the Corozal Container Terminal and the Telfers Container Terminal will be located. The ACP may, in

---

---

accordance with its constitutional, legal, and regulatory framework, engage in port operations and logistics activities in the areas under its exclusive jurisdiction through a Concession granted to a third party.

- b) Feasibility studies are currently underway in relation to the Corozal Container Terminal and the Telfers Container Terminal. These studies include market demand analysis, technical, and capacity assessments, risk evaluations, and detailed financial and economic analyses, together with conceptual design considerations for infrastructure and equipment. In parallel, social and environmental impact studies are being conducted to ensure sustainability and compliance with applicable regulations.
- c) Both Terminals are intended to be open-access, common user container terminals. Their primary role will be to serve as transshipment facilities to distribute cargo across the region, as well as providing services for empty container repositioning and may extend to local cargo handling if deemed operationally and commercially convenient. Each of the Terminals will operate separately, competitively, non-exclusively and efficiently, serving all interested carriers and routes, as well as regional feeder networks. The Concessionaires are expected to develop, operate, maintain, and commercially manage the relevant Terminal to deliver a world-class quality service and operational efficiency, attracting new container volume to the Republic of Panama. Each Terminal will function as integral components of the Panama Canal route and its logistics hub, reinforcing Panama's position as a leading regional connectivity platform.
- d) The ACP is seeking reputable, profitable, financially sound, and environmentally responsible, world-class international Terminal Operators with successful experience in operating major container terminals around the world to participate in the Tender Process

## 2.2. Concession Infrastructure and Footprint

- a) The land area that will be the subject of the Corozal Container Terminal concession (the "**Corozal Concession Land**") is strategically located in the east bank of the entrance waterway of the Pacific side of the Panama Canal and the land area that will be the subject of the Telfers Container Terminal concession (the "**Telfers Concession Land**", together with the Corozal Concession Land, the "**Concession Lands**") is strategically located in the east bank of the entrance waterway of the Atlantic side of the Panama Canal, where more than 10,000 vessels transit annually, alongside an existing double-stack container railway line, and a major transisthmian highway and roadways. The adjacent railway line is operated by the Panama Canal Railway Company under a concession granted by the Autoridad Marítima de Panamá ("**AMP**").
- b) The Concession Lands are owned by the ACP and have excellent waterfront locations within the Panama Canal's Pacific and Atlantic entrances. Each of the Concession Lands and their waterfronts are under the ACP's jurisdiction and offer ideal connectivity given that Panama is the point where America's East-West and North-South routes converge. Schedule 2 -

---

Indicative Location of Corozal and Schedule 3 – Indicative Location of Telfers of this RFQ provide information on the Concessions' location.

- c) The concession infrastructure will include quayside berths which can accommodate multiple Neopanamax ships simultaneously; container yards; gates; buildings, and operational facilities, and any other operational infrastructure; services; utilities; lighting; signaling; appurtenances; shops; together with such equipment and systems as are required for the efficient and safe operation of the berths and the container yards.

### **2.3. Concessionaire Scope of Work**

- a) Upon selection of each Concessionaire, the ACP anticipates executing a Concession Agreement that includes phases associated with the (i) design and engineering, (ii) construction and operation and (iii) maintenance of the relevant Terminal.
- b) During each phase of the Concession, the Concessionaires will be required to provide the ACP with documentation and regular reports on the design, construction, operational, and financial aspects of the Concession, access to all facilities, as well as auditing rights.
- c) The rights and obligations of the Concessionaire and the ACP will be defined in the Concession Agreement, a draft of which will be provided to Prequalified Parties during Stage 2 (Interaction and Dialogue) of the Tender Process described in Section 1.3 of this RFQ.
- d) The ACP is currently evaluating roles and responsibilities related to development, design and construction of infrastructure and superstructure and those topics will be open for discussion during the Stage 2 (Interaction and Dialogue) of the Tender Process.
- e) The ACP anticipates that the Concession Agreement will set forth a progressive project delivery approach as part of the scope of the Project. This approach will include early involvement by the Concessionaire, working collaboratively with the ACP, to define the project's scope and complete the phases.
- f) In operating and maintaining the infrastructure and associated facilities, including all assets and equipment, the Concessionaire will be expected to foster a culture of continuous improvement, ensuring efficient and safe performance, proactive optimization and maintenance, and ongoing enhancement of operational and commercial management practices.

### **2.4. ACP participation**

Under Article 3 of the Concessions Regulation, the ACP may invest directly in its Concessions, provided that such participation aligns with the Panama Canal's strategic objectives and public interest.
