A  **ZUUSE SOLUTION**

GCPAY

**CONSTRUCTION PAYMENT
MANAGEMENT**

A BETTER WAY

Managing the application for payment process between general contractors and subcontractors can be a daunting task and can drain the hours out of the finance team's day - manually managing schedules of values, change orders, lien waivers and compliance documents.

Payments to subcontractors can represent more than 75% of a project's cash outflows and being able to manage this process efficiently is paramount to the project's and general contractor's overall success.

GCPAY connects your entire construction project by managing the application, assessment and payment process through cloud collaboration between your project team and subcontractors.

LET THEM BUILD

Time is money, and it's precious. We get it. It's why we've created so many features that streamline, simplify, automate and integrate your subcontractor management processes.

GCPay takes the hassle out of lien waivers, invoices and compliances. You and your project team can spend your time doing what you do best.

YOUR INDUSTRY - OUR APP

We know construction. GCPay was created specifically for it. We are a trusted partner to America's general contractors, and have been for 15 years. We understand the obstacles that come with collaborating across multiple stakeholders and subcontractors and are across the legislation and compliance specific to what you do. We are proud of GCPay's functionality on the ground, and how it works for our thousands of users.

TO SERVE AND PROTECT

GCPay reduces risk in real time. It eliminates exposure to fraud and the need to store critical information on-site; everything is stored in the GCPay cloud platform. Generate unconditional lien waivers in exchange for payment, and reduce the risk of disruption to the entire supply chain. Payments are automatically restricted if compliance requirements (say, insurance) are not met. In fact, you and your subs receive alerts prior to this occurring.

EFFORTLESS REPORTING - MORE TRANSPARENCY

Let's imagine changing the dynamic of reporting: allowing the numbers, progress-to-date, and subcontractors' work to speak for itself.

We've made this a reality. You can grant access where you desire, and generate smart, targeted reports at the touch of a button. It creates transparency for all parties involved, and not at the expense of your time and energy.

FEATURES AT YOUR FINGERTIPS

Here are a few of the standout features of GCPay, accessible anywhere at any time, from any PC, tablet or phone.

STREAMLINED WORKFLOWS AND AUTOMATION

GCPay provides a central platform to automate and manage construction AFPs and payments, saving time, reducing errors and rework. Supply chain collaboration and cash flow are improved.

CREATE + EXCHANGE LIEN WAIVERS

Automate and digitize the collection and exchange of lien waivers, eliminating time and minimizing payment risk.

COLLABORATION + COMPLIANCE

Handle compliance document storage, audit trail and alerts in one place. Enable true supply chain collaboration and standardization of payment information in a shared cloud workspace.

ACH + PAYMENT ACCELERATION

Simplify and automate your payments. Make electronic payments to subs using ACH. Subs can accelerate invoice payment, improving cash flow and reducing project delivery risk.

SEAMLESS ACCOUNTING SYSTEM INTEGRATION

Automate seamless transfer of critical financial data between GCPay and most popular construction ERP solutions. Drive efficiency by eliminating redundant data entry and errors.

CUSTOMIZABLE REPORTING

Users have access to a customizable dashboard with on-demand status reports and action items pertinent to the payment process. You never have to feel behind again.
