INSTRUCTIONS FOR COMPLETING THE ENR GLOBAL SOURCEBOOK MARKET SURVEY

This survey is designed to rank firms based on 2025 contracting and/or design revenue in the individual market components of the main market categories measured in the Top International survey. For example, instead of simply ranking firms by their revenue in the Transportation main market, the Global Sourcebook survey will rank top firms in such market categories as airports, highways and marine facilities.

To participate in the Global Sourcebook rankings, fill out the on-line interactive survey form. The link to the on-line version will be posted on our website, <http://www.enr.com> in late March. To complete the survey online, you will need the six-digit company code.

ENR asks that you complete the Global Sourcebook survey, together with your Top International Survey Form, by **June 15, 2026**. If that deadline is not possible, a request for an extension should be made in writing and sent by e-mail to Jon Keller at kellerj@enr.com. Please include the date by which you expect to complete the survey.

To complete the ENR Sourcebook survey form, take the following steps:

- If you are a design firm, take the main market answers from Question D6 of your Top International survey and use them as the basis for the totals of the numbered entries on your Global Sourcebook survey.
- If you are a contractor, take the main market answers from Question GC4 of your Top International survey and use them as the basis for the totals of the numbered entries on your Global Sourcebook survey.
- After transferring the figures from your Top International Survey form, apportion the amounts for each heading among the various submarket sectors listed beneath the major headings.

EXAMPLE: If your company had \$80 million in domestic contracting revenue from transportation projects and \$20 million in international contracting revenue for transportation, please divide the \$80 million of domestic transportation revenue, as appropriate, among the six listed market sectors: (a) highways; (b) bridges; (c) marine & port facilities; (d) airports, including terminals; (e) mass transit, light rail, heavy rail; and (f) other. Do the same for the \$20 million of international transportation revenue. Follow the same procedure for any markets you work in. Design firms should follow the same procedure for all design revenue in each market sector.

While it is not required that you complete this portion of the Global Sourcebook survey to be ranked in the annual Top 225 International Design Firms and the Top 250 International Contractors lists, we strongly urge you to participate. The reaction among owners and other purchasers of construction services to the ENR Sourcebooks has been extremely enthusiastic and the Sourcebook has proven an excellent, and free, way for construction and design firms to showcase their areas of expertise.

If you have any questions, please do not hesitate to email Jon Keller at kellerj@enr.com or call him at (646) 849-7136.

REMINDER: THE DEADLINE FOR ONLINE SURVEY FILING IS JUNE 15, 2026
